Ifeanyi Anyanwu

Full-Stack Engineer | React · Next.js · Node.js · NestJS · TypeScript

anyanwuifeanyi001@gmail.com · linkedin.com/in/ifeanyianyanwu · github.com/ifeanyianyanwu

Summary

Full-stack engineer with 3+ years shipping production TypeScript applications, frontend-strong with backend experience in Node.js, Express and NestJS. Currently building NestJS APIs and frontend features at LetsDap, an events platform. Previously cut page load time from 9–15s to ~1.5s on a ~1,000-user marketplace and wrote a test suite from scratch to 75% coverage. First Class BSc (Hons) Computer Science; top 10 at CodeSprintMT 2026.

Skills

- **Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3
- **Frontend:** React, Next.js, Redux, code-splitting (React.lazy, Suspense), image optimisation (WebP), Lighthouse
- **Backend & data:** Node.js, NestJS, Express, REST APIs, MongoDB (Mongoose), Sanity CMS
- **Testing & DevOps:** Jest, React Testing Library, GitHub Actions CI/CD, Docker
- **Integrations:** Mastercard API (OAuth 1.0a), Credo payments, wallet-based authentication (Web3), Google Analytics API
- **Tools:** Git, Jira, Postman, Vercel

Experience

Full-Stack Engineer — LetsDap · Malta (Remote) · Full-time · Oct 2026 – Present

Event platform for discovering, creating and attending networking events.

- Build and maintain backend APIs in NestJS and TypeScript, using Docker for local development.
- Develop features end to end, from API integration through to frontend UI, in a production codebase tracked in Jira.

Software Engineer — MoneyPigeon · Remote · Contract · Mar 2024 – Oct 2025

Pre-launch crypto lending and borrowing platform; 7-person team.

- Integrated REST APIs for user authentication and virtual debit card issuance.
- Built the frontend in Next.js and TypeScript, including wallet-based sign-in and lending and borrowing transaction flows.
- Wrote the application's test suite from scratch with Jest and React Testing Library, taking coverage from 0% to 75%.
- Set up GitHub Actions CI to run tests and linting on every pull request, catching regressions before code review.

Frontend Engineer — Deimr · Famagusta, Cyprus (Remote) · Full-time · Feb 2023 – Jan 2024

Marketplace for electronics, spare parts and device-repair services.

- Cut page load time from 9–15s to ~1.5s (measured with Lighthouse) through route-level code-splitting with React.lazy and Suspense, WebP image conversion and Next.js caching.
- Migrated the frontend from React to Next.js and was the sole developer of the user dashboard and storefront, serving ~1,000 users.
- Owned frontend delivery and API integration with the backend team, and contributed to product planning.
- Interviewed, onboarded and mentored 2 frontend interns, and reviewed code for quality and consistency.

Frontend Engineer — Meksoft Limited · Enugu, Nigeria (Hybrid) · Contract · May 2022 – Dec 2022

- Replaced a manual transcript process that took a few weeks with automated processing through REST API integrations.
- Built student and admin dashboards in React and TypeScript for the transcript management system, now live at 1 university.
- Integrated Credo payments to automate payments, and validated APIs with Postman before release.

Projects

BabaPlug — Next.js, TypeScript, Sanity CMS, MongoDB · Apr 2025 · Live

- Full-stack content platform for product reviews and buying guides, with tag-based discovery, newsletter signup and admin content management.
- Built a consent-based, first-party analytics pipeline with custom React hooks and the Google Analytics API, aggregating engagement data in MongoDB.

Screen Guide — Next.js, Express, MongoDB, TMDB API · Jan 2025 · Live

- Full-stack movie and TV tracking app with an Express/MongoDB backend: open search and browsing, with authentication unlocking personal watchlists.

Education & Awards

BSc (Hons) Computer Science, First Class Honours — University of Wolverhampton (delivered by STC Higher Education, Pembroke, Malta) · Sep 2025 – May 2026, awarded Jul 2026

Advanced Diploma in Software Engineering, Distinction — Aptech Computer Education, Nigeria · May 2020 – Feb 2023

Top 10, CodeSprintMT 2026 (Open Category) — CodeSprint Malta / ICE Campus · Jul 2026

- Solo, day-long build of a contactless charity donation platform with role-based access, a live transaction ledger and multi-currency support; integrated the Mastercard sandbox using OAuth 1.0a (RSA-SHA256) and .p12 keystores.
